# LAMINEX® FUSION® SURFACES

#### **RETRO BOOMERANGS**

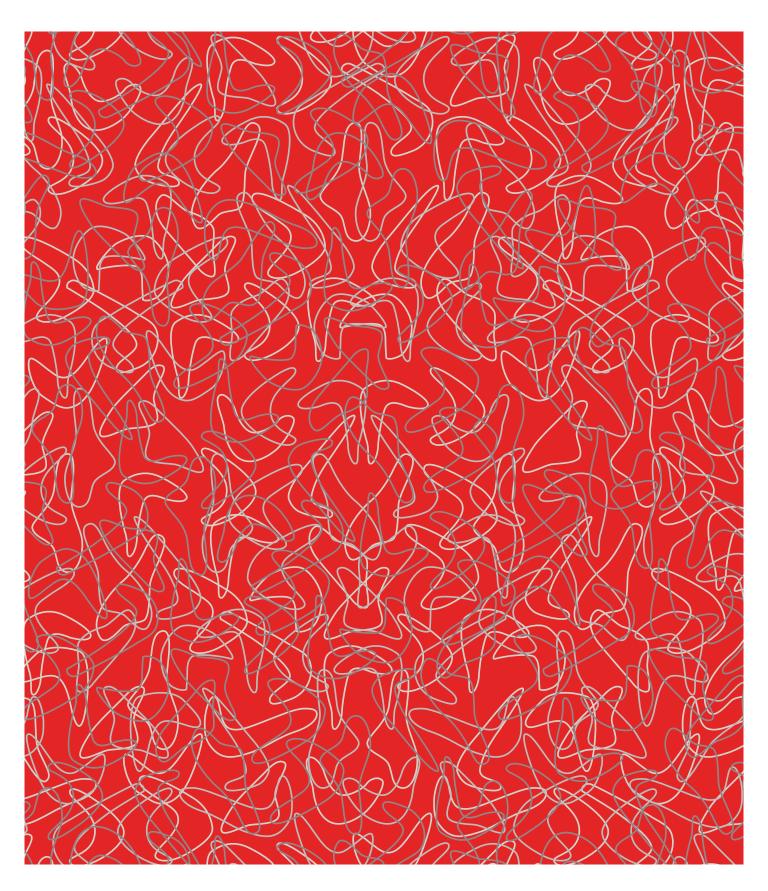

Over the years we've received countless requests from designers seeking to recreate the classic 1950s look, when happy kitchen colors, playful patio parties, charcoal grilled steaks and tinkling martini glasses were the order of the day.

The Laminex pattern now known as Boomerang was created in the early 1950s by industrial designer Brooks Stevens, later altered by Raymond Loewy, and first introduced under the name Skylark. A popular element in the era's kitchens, the pattern earned its nickname from its lively boomerang-shaped designs in happy-go-lucky colours that signalled the post-war generation's optimism for the future. As part of the Fusion Customart offer, Laminex has re-energized the Boomerang pattern by revisiting the original colours that now meet global colour trends – from spa-like aqua, rich-red coral and powdery blue, to contrasting tones of charcoal grey, black and crisp white.

Now you can take a walk down memory lane using these whimsical classics with cool retro appeal.
