

Laminex® Partitioning Systems

Laminex Toilet and Shower Partitioning Systems offer ease-of-use and high performance. The Laminex Partitioning Systems are available in Laminex Structural MR board as well as Laminex Compact Laminates that ensures all levels of toilet and shower partitioning requirements are covered. There is also a range of Seating and Locker Systems, manufactured using Laminex Compact Laminate.

LAMINEX PARTITIONING SYSTEMS

The Partitioning Systems application recommendations and appropriate board types available are:

LAMINEX STRUCTURAL MR BOARD

The Laminex Structural MR board is Craftwood MR MDF E0 core, pre-finished on both sides with a specially developed decorative easy-to-clean and hard wearing melamine surface.

Structural MR Applications

Applications or recommended areas of use are those subject to low abuse where a decorative and easy-to-care for surface is the desired outcome. Applications such as offices, hotels, restaurants and shopping centres, excluding areas that are hosed for cleaning.

For further information on the product performance and technical specifications of Laminex Structural MR – refer to the Laminex Structural MR section of the product catalogue.

LAMINEX COMPACT LAMINATES

13mm Laminex® Compact Laminates are a flat decorative panel based on thermosetting resins, homogeneously reinforced with cellulose fibres and

manufactured under high pressure and temperature.

Using special techniques, the panels have an integrated, decorative surface made of melamine-impregnated paper.

This product is available as either Multipurpose, Innovations or XR Grade Compact Laminate. The Innovations and XR Grade Compact Laminate have an electron beam cured (EBC) surface for enhanced surface wear and hygiene properties.

Compact Laminate Applications

Applications or recommended areas of use for the Laminex Compact Laminates Partitioning Systems are: schools, universities, caravan parks, gymnasiums, sporting change rooms, hotels, clubs, shopping centres, public areas, mining sites or wherever a highly water resistant, tough, hard-wearing and easy-to-care for surface is the desired outcome.

For further information on the product performance and technical specifications of Laminex Compact Laminates refer to the Laminex Compact Laminates section of the product catalogue.

The Complete Partitioning System

When accurate dimensions are provided, Laminex Partitioning Systems are supplied with all of the panels, foot assemblies, head and wall channelling and hardware (including screws) neatly packed into a solid box. The panels are accurately cut and almost completely pre-drilled. The Partitioning Systems even include the necessary drill bits, silicone sealant and installation plan to make installation as straight forward as possible.

Please note that three hinges are supplied with the hardware kit and all hinges must be used.

LAMINEX SEATING SYSTEMS

Laminex Seating Systems have been designed as a durable, easy to install seating system for demanding environments. The unique single panel seat with slots has been developed for maximum strength and aesthetics. Available in a range of Laminex Compact Laminates, the Seating Systems will integrate perfectly with the Laminex Partitioning Systems for a complete commercial washrooms and wet area fitout.

Laminex Seating Systems are available in a choice of three options; Wall Mounted, Island or Integrated Locker Seating Systems.

LAMINEX LOCKER SYSTEMS

Laminex Locker Systems are a uniquely designed range of secure storage solutions that have great durability and aesthetics. They have been developed with the rigours of public storage spaces in mind, being made from Laminex Compact Laminates. For wet area applications, a rigid and robust self-supporting plastic sheet carcass delivers a functional solution that is resistant to constant wetting and rigorous cleaning regimes.

For dry area applications, a Whiteboard MR carcass is used to provide a more cost effective solution where the lockers won't be exposed to continual wetting or be hosed out for cleaning.

The Seating Systems and Locker Systems application recommendations and appropriate board types available are:

LAMINEX COMPACT LAMINATE

13mm Laminex® Compact Laminates are a flat decorative panel based on thermosetting resins, homogeneously reinforced with cellulose fibres and manufactured under high pressure and temperature.

Using special techniques, the panels have an integrated, decorative surface made of melamine impregnated paper. This product is available as either Multipurpose, Innovations or XR Grade Compact Laminate. The Innovations and XR Grade Compact Laminate has an electron beam cured (EBC) surface for enhanced surface wear and hygiene properties.

Compact Laminate Applications

Applications or recommended areas of use for the Laminex Locker Systems and Seating Systems are: schools, universities, caravan parks, gymnasiums, sporting change rooms, hotels, clubs, shopping centres, public areas, mining sites or wherever a highly water resistant, tough, hard-wearing and easy-to-care for surface is the desired outcome. For further information on the product performance and technical specifications of Laminex Compact Laminates refer to the Laminex Compact Laminates section of the product catalogue.

Care and Maintenance

In the case of a soiled surface, built-up grime or a light stain, clean with warm soapy water or a detergent. To maintain a highly decorative surface, hard abrasive cleaners are not recommended.

Laminex Partitioning, Seating and Locker Systems (wet area option) made from Compact Laminates can withstand constant wetting and rigorous cleaning regimes such as hosing out.

However, Laminex Partitioning Systems made from Structural MR board and Locker Systems (Dry Area option) are suitable for areas that are not hosed out or exposed to constant wetting.

For further information on the complete Laminex Partitioning System product offer, installation guidelines and colours available – refer to the Laminex Partitioning Systems brochure or call 132 136.
