

Laminex Formica High Pressure Laminates

The Laminex Group

Chemwatch: **7512233** Version No: **3.1.1.1**

Safety Data Sheet according to WHS and ADG requirements

Chemwatch Hazard Alert Code: 2

Issue Date: 12/11/2014 Print Date: 20/11/2014 Initial Date: Not Available S.GHS.AUS.EN

SECTION 1 IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING

Product Identifier

Product name	Laminex Formica High Pressure Laminates	
Chemical Name	Not Applicable	
Synonyms	Formica Access Flooring, Formica Aquapanel, Formica Backing Boards, Formica Chemtop, Formica ColorCore, Formica Compact Laminate, Formica DecoMetal, Formica Fire Retardant Grade, Formica Freeform, Formica Interlaminates, Formica Laboratory Grade, Formica Premium Laminates, Formica laminates	
Proper shipping name	Not Applicable	
Chemical formula	Not Applicable	
Other means of identification	Not Available	
CAS number	Not Applicable	

Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses Used for decorative surfacing of furniture, cabinets, bench tops, walls, ceilings, floors and doors.

Details of the manufacturer/importer

Registered company name	The Laminex Group
Address	PO Box 407 Doncaster 3108 VIC Australia
Telephone	Not Available
Fax	Not Available
Website	www.thelaminexgroup.com.au
Email	Not Available

Emergency telephone number

Association / Organisation	Not Available
Emergency telephone numbers	Not Available
Other emergency telephone numbers	Not Available

SECTION 2 HAZARDS IDENTIFICATION

Classification of the substance or mixture

HAZARDOUS CHEMICAL. NON-DANGEROUS GOODS. According to the Model WHS Regulations and the ADG Code.

CHEMWATCH HAZARD RATINGS

	Min	Max	
Flammability	1		
Toxicity	1		0 = Minimum
Body Contact	1		1 = Low 2 = Moderate
Reactivity	0		3 = High
Chronic	2		4 = Extreme

Poisons Schedule	Not Applicable	
GHS Classification [1]	Skin Sensitizer Category 1, Carcinogen Category 2	
Legend:	1. Classified by Chemwatch; 2. Classification drawn from HSIS; 3. Classification drawn from EC Directive 1272/2008 - Annex VI	

Label elements

GHS label elements

Version No: **3.1.1.1**

Laminex Formica High Pressure Laminates

Issue Date: 12/11/2014 Print Date: 20/11/2014

Hazard statement(s)

H317	May cause an allergic skin reaction
H351	Suspected of causing cancer

Precautionary statement(s) Prevention

P201	Obtain special instructions before use.	
P280	Wear protective gloves/protective clothing/eye protection/face protection.	
P261	Avoid breathing dust/fume/gas/mist/vapours/spray.	
P272	Contaminated work clothing should not be allowed out of the workplace.	

Precautionary statement(s) Response

P308+P313	IF exposed or concerned: Get medical advice/attention.	
P302+P352	F ON SKIN: Wash with plenty of water and soap	
P333+P313	If skin irritation or rash occurs: Get medical advice/attention.	
P362+P364	Take off contaminated clothing and wash it before reuse.	

Precautionary statement(s) Storage

P405	Store locked up.
------	------------------

Precautionary statement(s) Disposal

P501 Dispose of contents/container to authorised chemical landfill or if organic to high temperature incineration

SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

Substances

See section below for composition of Mixtures

Mixtures

CAS No	%[weight]	Name
Not Available	60-75	paper
9003-35-4	<35	phenol/ formaldehyde resin
Not Available	<7	paper-pigmented dye
9003-08-1	<3	melamine/ formaldehyde resin
Not Available	2	plasticisers
Not Available	<2	fire retardant compound
7631-86-9	<1	silica amorphous

SECTION 4 FIRST AID MEASURES

Description of first aid measures

-	
Eye Contact	If this product comes in contact with eyes: Wash out immediately with water. If irritation continues, seek medical attention. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.
Skin Contact	Brush off dust. In the event of abrasion or irritation of the skin seek medical attention.
Inhalation	 If dust is inhaled, remove from contaminated area. Encourage patient to blow nose to ensure clear passage of breathing. If irritation or discomfort persists seek medical attention.
Ingestion	Not normally a hazard due to the physical form of product. The material is a physical irritant to the gastro-intestinal tract Immediately give a glass of water. First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

SECTION 5 FIREFIGHTING MEASURES

Extinguishing media

- Water spray or fog.
- Foam.
- Dry chemical powder.
- BCF (where regulations permit).

Special hazards arising from the substrate or mixture

Fire Incompatibility

Avoid contamination / mixing of dust with oxidising agents as fire may result.

Chemwatch: **7512233** Page 3 of 6 Issue Date: 12/11/2014 Version No: 3.1.1.1 Print Date: 20/11/2014

Laminex Formica High Pressure Laminates

Advice for firefighters

Fire Fighting

- ▶ Alert Fire Brigade and tell them location and nature of hazard.
- Wear breathing apparatus plus protective gloves.
- ▶ Prevent, by any means available, spillage from entering drains or water courses.
- ▶ Use water delivered as a fine spray to control fire and cool adjacent area.

Combustible

Fire/Explosion Hazard

Wood articles do not normally constitute an explosion hazard.

Wood dusts, however, may constitute an explosion risk where the mean particle size is less than 200 microns, and where as little as 10% of the mixture contains dust less than 80 microns in size. Only weak explosions are likely where the mean particle size exceeds 200 microns. Wood dust is considered to be explosive if ignition of part of a cloud of wood dust results in the propagation of flame through the rest of the cloud.

SECTION 6 ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Minor Spills	Refer to major spills.
Major Spills	Clean up all spills immediately. Wear gloves and safety glasses. Secure load if safe to do so. Bundle / collect recoverable product.
	Personal Protective Equipment advice is contained in Section 8 of the MSDS.

SECTION 7 HANDLING AND STORAGE

Precautions for safe handling

Safe handling	No special handling procedures required.	
Other information	 Keep dry. Store under cover. Store in a well ventilated area. Store away from sources of heat or ignition. 	

Conditions for safe storage, including any incompatibilities

Suitable container	► Generally not applicable.
Storage incompatibility	▶ Keep dry

PACKAGE MATERIAL INCOMPATIBILITIES

Not Available

SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Control parameters

OCCUPATIONAL EXPOSURE LIMITS (OEL)

INGREDIENT DATA

Source	Ingredient	Material name		STEL	Peak	Notes
Australia Exposure Standards	silica amorphous	Silica - Amorphous Fumed silica (respirable dust) / Fumed silica (respirable dust)	2 mg/m3	Not Available	Not Available	Not Available

EMERGENCY LIMITS

Ingredient	Material name	TEEL-1	TEEL-2	TEEL-3
silica amorphous	Silica, amorphous fumed	6 mg/m3	6 mg/m3	630 mg/m3
silica amorphous	Silica amorphous hydrated	6 mg/m3	6 mg/m3	85 mg/m3

Ingredient	Original IDLH	Revised IDLH
paper	Not Available	Not Available
phenol/ formaldehyde resin	Not Available	Not Available
paper-pigmented dye	Not Available	Not Available
melamine/ formaldehyde resin	Not Available	Not Available
plasticisers	Not Available	Not Available
fire retardant compound	Not Available	Not Available
silica amorphous	N.E. mg/m3 / N.E. ppm	3,000 mg/m3

Exposure controls

Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly
effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection

Appropriate engineering controls

The basic types of engineering controls are: Process controls which involve changing the way a job activity or process is done to reduce the risk.

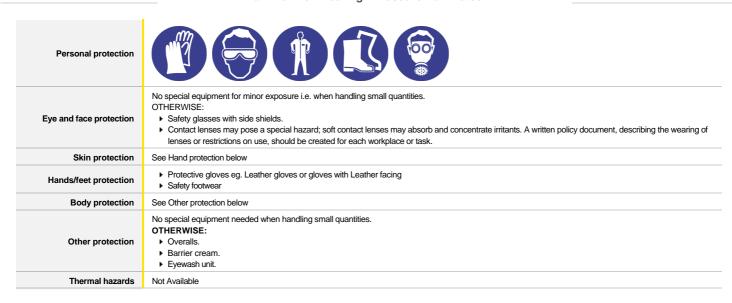

Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment.

|Dust and vapour extraction system is recommended for static full time|exposures.

Version No: **3.1.1.1**

Laminex Formica High Pressure Laminates

Issue Date: 12/11/2014 Print Date: 20/11/2014

Recommended material(s)

GLOVE SELECTION INDEX

Glove selection is based on a modified presentation of the:

"Forsberg Clothing Performance Index".

The effect(s) of the following substance(s) are taken into account in the *computer*

generated selection: Laminex Formica High Pressure Laminates Not Available

CPI

Material

* CPI - Chemwatch Performance Index A: Best Selection

B: Satisfactory; may degrade after 4 hours continuous immersion

C: Poor to Dangerous Choice for other than short term immersion

NOTE: As a series of factors will influence the actual performance of the glove, a final selection must be based on detailed observation. -

* Where the glove is to be used on a short term, casual or infrequent basis, factors such as "feel" or convenience (e.g. disposability), may dictate a choice of gloves which might otherwise be unsuitable following long-term or frequent use. A qualified practitioner should be consulted.

Respiratory protection

Not Applicable

SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

Appearance	Manufactured as high pressure laminates ranging in thickness from 0.5 mm to 30 mm. Made from layers of resin impregnated paper, bonded together under heat and pressure. Newly manufactured and freshly cut surfaces may have a faint resin odour.				
Physical state	Manufactured	Relative density (Water = 1)	1.1-1.7		
Odour	Not Available	Partition coefficient n-octanol / water	Not Available		
Odour threshold	Not Available	Auto-ignition temperature (°C)	>220		
pH (as supplied)	Not Applicable	Decomposition temperature	Not Available		
Melting point / freezing point (°C)	Not Applicable	Viscosity (cSt)	Not Applicable		
Initial boiling point and boiling range (°C)	Not Applicable	Molecular weight (g/mol)	Not Applicable		
Flash point (°C)	Not Applicable	Taste	Not Available		
Evaporation rate	Not Applicable	Explosive properties	Not Available		
Flammability	Not Applicable	Oxidising properties	Not Available		
Upper Explosive Limit (%)	Not Applicable	Surface Tension (dyn/cm or mN/m)	Not Applicable		
Lower Explosive Limit (%)	Not Applicable	Volatile Component (%vol)	Not Applicable		
Vapour pressure (kPa)	Not Applicable	Gas group	Not Available		
Solubility in water (g/L)	Immiscible	pH as a solution(1%)	Not Applicable		
Vapour density (Air = 1)	Not Applicable	VOC g/L	Not Available		

SECTION 10 STABILITY AND REACTIVITY

Reactivity	See section 7	
Chemical stability	cal stability Product is considered stable and hazardous polymerisation will not occur.	

Version No: **3.1.1.1**

Laminex Formica High Pressure Laminates

Issue Date: 12/11/2014 Print Date: 20/11/2014

Possibility of hazardous reactions	See section 7
Conditions to avoid	See section 7
Incompatible materials	See section 7
Hazardous decomposition products	See section 5

SECTION 11 TOXICOLOGICAL INFORMATION

TOXICITY

Information	on	toxico	logical	effects
-------------	----	--------	---------	---------

Laminex Formica High

Inhaled	Not normally a hazard due to physical form of product. Generated dust may be discomforting to the upper respiratory tract. Formaldehyde vapour is irritating to the upper respiratory tract.
Ingestion	Overexposure is unlikely in this form. The dust may be discomforting and abrasive if swallowed.
Skin Contact	Not normally a hazard due to physical form of product. The material may be mildly discomforting and abrasive to the skin. Sharp edges may abrade the skin
Eye	Not normally a hazard due to physical form of product. The dust may be discomforting
Chronic	 Hazard relates to dust released by sawing, cutting, sanding, trimming or other finishing operations. [The material will emit small amounts of formaldehyde which is irritating to the mucous membranes.

IRRITATION

Pressure Laminates	Not Available	Not Available
	TOXICITY	IRRITATION
	Dermal (rabbit) LD50: >5000 mg/kg	[Manufacturer Mon]
phenol/ formaldehyde resin	Oral (rat) LD50: >2500 mg/kg	Eye(rabbit):40/110 mod - Draize
		Skin (rabbit): 3/8 - mod - Draize
	Not Available	Not Available
	TOXICITY	IRRITATION
melamine/ formaldehyde resin	Dermal (rabbit) LD50: >10,000 mg/kg	No Data Reported
103111	Oral (rat) LD50: >10,000 mg/kg	
	Not Available	Not Available
	TOXICITY	IRRITATION
	Dermal (rabbit) LD50: >5000 mg/kg *	* [Grace]
silica amorphous	Inhalation (rat) LC50: >0.139 mg/l/14h *	Eye (rabbit): non-irritating *
	Oral (rat) LD50: 3160 mg/kg	Skin (rabbit): non-irritating *
	Not Available	Not Available

Not available. Refer to individual constituents.

PHENOL/
FORMALDEHYDE RESIN

The following information refers to contact allergens as a group and may not be specific to this product.

Contact allergies quickly manifest themselves as contact eczema, more rarely as urticaria or Quincke's oedema. The pathogenesis of contact eczema involves a cell-mediated (T lymphocytes) immune reaction of the delayed type. Other allergic skin reactions, e.g. contact urticaria, involve antibody-mediated immune reactions.

SILICA AMORPHOUS

For silica amorphous:

When experimental animals inhale synthetic amorphous silica (SAS) dust, it dissolves in the lung fluid and is rapidly eliminated. If swallowed, the vast majority of SAS is excreted in the faeces and there is little accumulation in the body. Following absorption across the gut, SAS is eliminated via urine without modification in animals and humans. SAS is not expected to be broken down (metabolised) in mammals.

Reports indicate high/prolonged exposures to amorphous silicas induced lung fibrosis in experimental animals; in some experiments these effects were reversible. [PATTYS]

Acute Toxicity	0	Carcinogenicity	✓
Skin Irritation/Corrosion	0	Reproductivity	0
Serious Eye Damage/Irritation	0	STOT - Single Exposure	0
Respiratory or Skin sensitisation	~	STOT - Repeated Exposure	0
Mutagenicity	0	Aspiration Hazard	0

Chemwatch: **7512233** Page **6** of **6**

Version No: 3.1.1.1

Laminex Formica High Pressure Laminates

Issue Date: 12/11/2014 Print Date: 20/11/2014

Data Not Available to make classification

CMR STATUS

Not Applicable

SECTION 12 ECOLOGICAL INFORMATION

Toxicity

DO NOT discharge into sewer or waterways.

Persistence and degradability

Ingredient	Persistence: Water/Soil	Persistence: Air
silica amorphous	LOW	LOW

Bioaccumulative potential

Ingredient	Bioaccumulation
silica amorphous	LOW (LogKOW = 0.5294)

Mobility in soil

Ingredient	Mobility
silica amorphous	LOW (KOC = 23.74)

SECTION 13 DISPOSAL CONSIDERATIONS

Waste treatment methods

Product / Packaging disposal

- ▶ Recycle wherever possible or consult manufacturer for recycling options.
- ▶ Consult State Land Waste Management Authority for disposal.
- ▶ Bury residue in an authorised landfill.
- Recycle containers if possible, or dispose of in an authorised landfill.

SECTION 14 TRANSPORT INFORMATION

Labels Required

Marine Pollutant	NO
HAZCHEM	Not Applicable

Land transport (ADG): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

Air transport (ICAO-IATA / DGR): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

Sea transport (IMDG-Code / GGVSee): NOT REGULATED FOR TRANSPORT OF DANGEROUS GOODS

SECTION 15 REGULATORY INFORMATION

Safety, health and environmental regulations / legislation specific for the substance or mixture

phenol/ formaldehyde resin(9003-35-4) is found on the following regulatory lists	"Australia Inventory of Chemical Substances (AICS)"
melamine/ formaldehyde resin(9003-08-1) is found on the following regulatory lists	"Australia Inventory of Chemical Substances (AICS)"
silica amorphous(7631-86-9) is found on the following regulatory lists	"Australia Exposure Standards","International Agency for Research on Cancer (IARC) - Agents Classified by the IARC Monographs","Australia Inventory of Chemical Substances (AICS)","Australia Hazardous Substances Information System - Consolidated Lists"

SECTION 16 OTHER INFORMATION

Other information

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

A list of reference resources used to assist the committee may be found at:

www.chemwatch.net/references

The (M)SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.
