Chemwatch: 4772-91 Version No: 3.1.1.1 Safety Data Sheet according to WHS and ADG requirements

# SECTION 1 IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING

### **Product Identifier**

Product name	Trade Essentials Plywood
Synonyms	Trade Essentials Birch Plywood B/B Grade, Trade Essentials Formply F14, Trade Essentials Hoop Plywood AC Interior, Trade Essentials Lauan Plywood BB/CC Grade, Trade Essentials Marine Plywood BS1088 (Pink Species), Trade Essentials Non-Structural CD Plywood, Trade Essentials Plywood Bracing F22 D/D, Trade Essentials Plywood Bracing H2 Treated, Trade Essentials Structural CD Plywood F8, Trade Essentials Structural Grade Flooring F11
Other means of identification	Not Available

### Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses	Panel sheets used in residential, commercial, and industrial construction, and/or as a general purpose building material.

### Details of the supplier of the safety data sheet

Registered company name	Laminex Group Pty Ltd
Address	90-94 Tram Road Doncaster VIC 3108 Australia
Telephone	+61 3 9848 4811
Fax	+61 3 9840 6513
Website	www.laminexaustralia.com.au
Email	Not Available

# Emergency telephone number

Association / Organisation	Not Available
Emergency telephone numbers	Not Available
Other emergency telephone numbers	Not Available

### **SECTION 2 HAZARDS IDENTIFICATION**

# Classification of the substance or mixture

# NON-HAZARDOUS CHEMICAL. NON-DANGEROUS GOODS. According to the WHS Regulations and the ADG Code.#

Dust generated from shaping, cutting and sawing operations carried out on this product will contain cured binder/wood particles and may contain wood dust without binder. Wood dust is a hazardous substance according to the NOHSC criteria.

and "may cause Sensitisation by inhalation and skin contact" (R42/43) and "may cause cancer by inhalation" (R49)

### Substances

See section below for composition of Mixtures

### Mixtures

CAS No	%[weight]	Name
Not Available	>90	wood veneer (softwood or hardwood)
40798-65-0	<10	phenol/ formaldehyde polymer sodium salt
		or
9011-05-6	<10	urea/ formaldehyde resin
		residual bonding reactants not more than
50-00-0	0.01	formaldehyde.
		H2 treated grade contains
82657-04-3	0.003	<u>bifenthrin</u>
		wood working operations may produce
Not avail.	NotSpec.	wood dust softwood
Not avail.	NotSpec.	wood dust hardwood
Not Available	NotSpec.	cured binder

### **SECTION 4 FIRST AID MEASURES**

# Description of first aid measures

Eye Contact	If this product comes in contact with eyes:  • Wash out immediately with water.  • If irritation continues, seek medical attention.  • Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.
Skin Contact	Brush off dust. In the event of abrasion or irritation of the skin seek medical attention.
Inhalation	<ul> <li>If dust is inhaled, remove from contaminated area.</li> <li>Encourage patient to blow nose to ensure clear passage of breathing.</li> <li>If irritation or discomfort persists seek medical attention.</li> </ul>
Ingestion	Not normally a hazard due to the physical form of product. The material is a physical irritant to the gastro-intestinal tract  Immediately give a glass of water.  First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

# Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

# **SECTION 5 FIREFIGHTING MEASURES**

HAZCHEM

# Extinguishing media

- ► Water spray or fog.
- Foam.
- ► Dry chemical powder.
- ► BCF (where regulations permit).

# Special hazards arising from the substrate or mixture

Not Applicable

	The second secon	
Fire Incompatibility	Avoid contamination/mixing of dust with oxidising agents as fire may result	
Advice for firefighters		
Fire Fighting	<ul> <li>Alert Fire Brigade and tell them location and nature of hazard.</li> <li>Wear breathing apparatus plus protective gloves.</li> <li>Prevent, by any means available, spillage from entering drains or water courses.</li> <li>Use water delivered as a fine spray to control fire and cool adjacent area.</li> </ul>	
Fire/Explosion Hazard	<ul> <li>Wood articles do not normally constitute an explosion hazard.</li> <li>Wood dusts, however, may constitute an explosion risk where the mean particle size is less than 200 microns, and where as little as 10% of the mixture contains dust less than 80 microns in size. Only weak explosions are likely where the mean particle size exceeds 200 microns. Wood dust is considered to be explosive if ignition of part of a cloud of wood dust results in the propagation of flame through the rest of the cloud.</li> </ul>	

# Trade Essentials Plywood

Issue Date: **07/07/2016**Print Date: **02/02/2017** 

### **SECTION 6 ACCIDENTAL RELEASE MEASURES**

### Personal precautions, protective equipment and emergency procedures

See section 8

### **Environmental precautions**

See section 12

# Methods and material for containment and cleaning up

Minor Spills	Refer to major spills.
Major Spills	<ul> <li>Clean up all spills immediately.</li> <li>Secure load if safe to do so.</li> <li>Bundle/collect recoverable product.</li> <li>Collect remaining material in containers with covers for disposal.</li> <li> Wear gloves and safety glasses.</li> </ul>

Personal Protective Equipment advice is contained in Section 8 of the SDS.

### **SECTION 7 HANDLING AND STORAGE**

#### Precautions for safe handling

Safe handling	No special handling procedures required.
Other information	<ul> <li>Keep dry.</li> <li>Store under cover.</li> <li>Store in a well ventilated area.</li> <li>Store away from sources of heat or ignition.</li> </ul>

### Conditions for safe storage, including any incompatibilities

Suitable container	► Generally not applicable.
Storage incompatibility	► Keep dry

### **SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION**

Material name

### **Control parameters**

# OCCUPATIONAL EXPOSURE LIMITS (OEL)

Ingredient	Original IDLH		Revised IDLH		
wood veneer (softwood or hardwood)	Not Available N		Not Available		
phenol/ formaldehyde polymer sodium salt	Not Available		Not Available		
urea/ formaldehyde resin	Not Available		Not Available		
formaldehyde.	30 ppm		20 ppm		
bifenthrin	Not Available Not Available				
wood dust softwood	Not Available		Not Available Not Available		
wood dust hardwood	Not Available		Not Available		
cured binder	Not Available		Not Available		

### **Exposure controls**

Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection.

TEEL-2

TEEL-3

# Appropriate engineering controls

The basic types of engineering controls are:

Process controls which involve changing the way a job activity or process is done to reduce the risk.

Enclosure and/or isolation of emission source which keeps a selected hazard "physically" away from the worker and ventilation that strategically "adds" and "removes" air in the work environment.

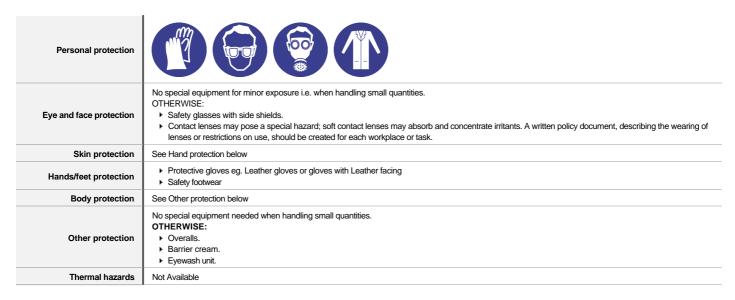

If exposure to workplace dust is not controlled, respiratory protection is required; wear SAA approved dust respirator.

Dust and vapour extraction system is recommended for static full time|exposures.

Version No: 3.1.1.1

### **Trade Essentials Plywood**

Issue Date: **07/07/2016**Print Date: **02/02/2017** 

### Recommended material(s)

### GLOVE SELECTION INDEX

Glove selection is based on a modified presentation of the:

"Forsberg Clothing Performance Index".

The effect(s) of the following substance(s) are taken into account in the *computer-generated* selection:

Trade Essentials Plywood

Material	СРІ
BUTYL	С
NATURAL RUBBER	С
NATURAL+NEOPRENE	С
NEOPRENE	С
NEOPRENE/NATURAL	С
NITRILE	С
PE	С
PE/EVAL/PE	С
PVC	С
TEFLON	С
VITON	С

- \* CPI Chemwatch Performance Index
- A: Best Selection
- B: Satisfactory; may degrade after 4 hours continuous immersion
- C: Poor to Dangerous Choice for other than short term immersion

**NOTE**: As a series of factors will influence the actual performance of the glove, a final selection must be based on detailed observation. -

### Respiratory protection

Type BAX-P Filter of sufficient capacity. (AS/NZS 1716 & 1715, EN 143:2000 & 149:2001, ANSI Z88 or national equivalent)

Where the concentration of gas/particulates in the breathing zone, approaches or exceeds the "Exposure Standard" (or ES), respiratory protection is required.

Degree of protection varies with both face-piece and Class of filter; the nature of protection varies with Type of filter.

Required Minimum Protection Factor	Half-Face Respirator	Full-Face Respirator	Powered Air Respirator
up to 10 x ES	BAX-AUS P2	-	BAX-PAPR-AUS / Class 1 P2
up to 50 x ES	-	BAX-AUS / Class 1 P2	-
up to 100 x ES	-	BAX-2 P2	BAX-PAPR-2 P2 ^

### ^ - Full-face

A(All classes) = Organic vapours, B AUS or B1 = Acid gasses, B2 = Acid gas or hydrogen cyanide(HCN), B3 = Acid gas or hydrogen cyanide(HCN), E = Sulfur dioxide(SO2), G = Agricultural chemicals, K = Ammonia(NH3), Hg = Mercury, NO = Oxides of nitrogen, MB = Methyl bromide, AX = Low boiling point organic compounds(below 65 degC)

### **SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES**

# Information on basic physical and chemical properties

Appearance	Manufactured pressed boards. Newly manufactured board and freshly cut surfaces may have a pine odour. Depending on age of board, formaldehyde may reappear on machining because of exposure of fresh surfaces by sawing, routing. When cutting with blunt tools or when cutting speeds are low if formaldehyde is given off as heat developed starts to decompose the glue.		
Physical state	Manufactured	Relative density (Water = 1)	Not Available
Odour	Not Available	Partition coefficient n-octanol / water	Not Available
Odour threshold	Not Available	Auto-ignition temperature (°C)	>200
pH (as supplied)	Not Applicable	Decomposition temperature	Not Available
Melting point / freezing point (°C)	Not Applicable	Viscosity (cSt)	Not Applicable
Initial boiling point and boiling range (°C)	Not Applicable	Molecular weight (g/mol)	Not Applicable
Flash point (°C)	Not Applicable	Taste	Not Available

<sup>\*</sup> Where the glove is to be used on a short term, casual or infrequent basis, factors such as "feel" or convenience (e.g. disposability), may dictate a choice of gloves which might otherwise be unsuitable following long-term or frequent use. A qualified practitioner should be consulted.

# **SECTION 10 STABILITY AND REACTIVITY**

Reactivity	See section 7
Chemical stability	Product is considered stable and hazardous polymerisation will not occur.
Possibility of hazardous reactions	See section 7
Conditions to avoid	See section 7
Incompatible materials	See section 7
Hazardous decomposition products	See section 5

Although inhalation is not thought to produce harmful effects (as classified under EC Directives), the material may still produce health damage, especially

# **SECTION 11 TOXICOLOGICAL INFORMATION**

Inhaled	where pre-existing organ (e.g. liver, kidney) damage is evident.  Hazard relates to dust released by sawing, cutting, sanding, trimming or other finishing operations.  Generated dust may be discomforting to the upper respiratory tract. Formaldehyde vapour is irritating to the upper respiratory tract.			
Ingestion	Overexposure is unlikely in this form.  The dust may be discomforting and abrasive if swallowed.			
Skin Contact	Not normally a hazard due to physical form of product.  The material may be mildly discomforting and abrasive to the skin. Sharp edges may abrade the skin			
Eye	Not normally a hazard due to physical form of product. The dust may be discomforting			
Chronic	This manufactured article is considered to have low hazard potential if handling and personal protection recommendations are followed  The material will emit small amounts of formaldehyde which is irritating to the mucous membranes. Wood dust may cause skin and respiratory sensitisation.

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.
